 5. tc A group of buildings (structures) named in ~~the~~ in ~~the~~ and
 shapes but generally large and impressive in ~~the~~ a ~~so~~ cold
 perhaps snowy place. This group of buildings is fenced
 off (secure) from what may be a nearby populated
 area. One of the buildings appears round or rounded, and
 reminds me of a nuclear power plant. Steam or smoke
 and coal smells characterize the site. ~~that's~~ ~~water~~
~~or~~ ~~water~~ Construction of some form
 may be underway. If the site is a power plant
~~that~~ may not be "on line" at present because there
 is no sense of emergency. ~~that~~ The site has a
 mechanical/technical/power control type function. People
 at the site are "workers" and ~~do~~ wear uniforms (NFI).

WANG Summary: a fenced group of structures characterized by
 smoke or steam reminiscent of a power plant.
